Did *you* know?

SMx Air Ride Pads

SMx Air Ride™ technology

Comfort Fit™

The fit of your saddle pad can ultimately determine your horse's level of comfort during a ride. Fit, shock absorption and ability to keep the saddle in place are all determining factors of a saddle pad's effectiveness.

That's why the Comfort Fit Western Saddle Pad by Professional's Choice was designed with all of these factors in mind. 15 years of scientific study went into creating the perfect blend of internal mechanics on the Comfort-Fit Saddle Pad. The seamlessly woven contoured pad is void of any cuts or re-stitching, and features two Air Ride panels

that work independently to flex with the horse's movement. This ensures that your saddle stays firmly in place no matter how hard your horse is performing. The Air Ride material is comprised of closed-cell bubbles that react to pressure from your body and your horse's by distributing it over a wider area, eliminating pressure points.

Hunter/Jumper Pad

The Professional's Choice Hunter/Jumper pad is crafted specifically for work over fences. Made of soft quilted cotton, the pad doesn't add any additional bulk while wicking away moisture that develops during hard rides. In addition, a lightweight layer of UltraShock™ lines the saddle's contact area so that as your horse jumps it doesn't feel the impact of the saddle's pressure points, as shock is instantly reduced by the UltraShock™ material before it ever reaches your horse.

SMx® Air Ride English Under Pad

This non-slip pad is carefully constructed from energy absorbing air channels that allow air to circulate, cooling the horse's back for maximum comfort. With its contoured high rise at the withers and unique conforming design, this pad will enhance saddle fit and the comfort of your horse when worn with any English saddle.
